PROFILE

I have experience in data engineering, machine learning, computer vision, and AI-driven decision systems, and I currently focus on Agentic and multi-agent LLM systems for strategic reasoning and real-world decision-making.

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST) Daejeon, South Korea.
M.Sc., Graduate School of Data Science (GPA: 3.38/4.3) [Transcript] [Diploma] Mar. 2024 - Feb. 2026
Thesis: Proposing and Validating LLM-Based Media Bias Evaluation Framework [Thesis]

Universitas Gadjah Mada Yogyakarta, Indonesia.
Bachelor's Degree in Computer Science (GPA: 3.41/4.0) [Transcript] [Diploma] Aug. 2017 - Jul. 2021
Thesis: Brand Logo Detection in User-Generated Content Using YOLO Object Detection

Universiti Kebangsaan Malaysia Bangi, Malaysia.
ASEAN Exchange Program (CGPA: 3.67/4.0) [Transcript] Jul. 2019 - Aug. 2019

EXPERIENCE

AI Engineer Mar 2026 - Present
Axinvent, Inc. Daejeon, South Korea

- Conducted research on a digital-pathology education platform, developing a content-aware self-adaptive controller that coordinates AI-driven image delivery for low-latency medical-image broadcasts at scale.

Graduate Research Assistant Mar 2024 - Feb 2026
Knowledge Information Research Center (KIRC), KAIST Daejeon, South Korea

- Collaborated with AID Korea (Animal Industry Data) on a SmartFarm project, developing predictive models for livestock health monitoring.
- Co-authored a peer-reviewed journal paper proposing an anomaly detection approach for identifying aggressive pig behaviors.

Data Engineer Mar 2022 - Dec 2023
PT. Astra Graphia Information Technology (AGIT) Jakarta, Indonesia

- Designed, developed, and maintained efficient batch and real-time data pipelines in production for a project assigned by Astra Motor (PT Astra International Tbk. – Honda Sales Operation).
- Ensured the accuracy of data extraction, transformation, and loading processes by maintaining and optimizing the data infrastructure.
- Automated data workflows, including data ingestion, aggregation to enhance operational efficiency.
- Conducted thorough testing and debugging of data pipelines to resolve any issues or bottlenecks.
- Successfully migrated millions of rows of data from an outdated system to a microservice-based system.

Backend Developer Dec 2021 - Mar 2022
PT. Astra Graphia Information Technology (AGIT) Jakarta, Indonesia

- Participated in the intensive one-month ASP.NET bootcamp, engaging in practical coding exercises and project assignments.
- Learned how to effectively use C# to develop robust web applications, focusing on best practices and industry standards.
- Acquired knowledge and skills related to microservice architecture.

- Worked collaboratively with fellow bootcamp participants to complete group projects and enhance problem-solving abilities.

PUBLICATIONS

Application of Anomaly Detection to Identifying Aggressive Pig Behaviors Using Reconstruction Loss Inversion [\[PDF\]](#) [\[Code\]](#)

Hyun-Soo Kim, Yu Sung Edward Kim, **Fania Ardelia Devira**, and Mun Yong Yi

AgriEngineering, vol. 6, no. 4, pp. 4442–4459, 2024.

SCHOLARSHIPS & AWARDS

- **KAIST Scholarship (2024.03-2026.02):** Received a fully funded Master’s program scholarship, including tuition fee and living expenses.
- **Excellent Award, Chungcheong Student Startup Competition (2025.07):** Developed crop yield prediction models using agricultural datasets with machine-learning-based analysis and received an Excellent Award sponsored by SCOUT.

LICENSES & CERTIFICATIONS

- [Python for Data Science, IBM](#) (2020.09)
- [Data Science Foundations - Level 1, IBM](#) (2020.06)
- [Introduction to Data Science, Cognitive Class](#) (2020.06)
